

LOCAL 1005
Proud Canadian Steelworkers

This May Day USW 1005 stands in solidarity with oppressed people throughout the World. Workers are fighting for fair wages, benefits, pension, and safe working conditions. Additionally, indigenous people are struggling against their colonialist occupiers, women are in an ongoing struggle for equality, and people of colour in their fight against systemic racism. LGBTQIA2S+ community are still working to have their Human Rights recognized worldwide.

We need an anti-war government that will invest in education, public housing, and healthcare instead of funding foreign wars.

We need a government that will stand up to corporate greed so working families can afford essentials such as housing, food, and medication. It shouldn't be a radical idea to stop greedflation and renovations.

Finally, we need a government that has the courage to demand an immediate and lasting ceasefire in Gaza. We need an end to the occupation and a path forward so that people of Palestine and Israel can live in dignity and security.

Please join us 4:00pm, Wednesday May 1 at 55 Bay Street South (Federal Building). We will march to the Workers Arts and Heritage Centre at 51 Stuart Street and join Hamilton & District Labour Council (HDLC) for a BBQ.
